

Interlink is a customer-focused, value-add Distribution Company, representing select manufacturers of networking products to a global network of Solution Providers, Value Added Resellers, System Integrators and Network Service Providers. Our customers receive prompt and personalized service from qualified, experienced and certified Sales and System Engineers.

Communications Test Design, Inc.

A leader in the Global Engineering, Repair & Service industry, CTDI provides groundbreaking maintenance and product service solutions to the telecommunications industry. From the Verilink family of access products to RUS initiatives that require DSL extension or optical solutions requiring EPON/RFoG technologies, CTDI has a comprehensive portfolio of solutions.

The Asterisk Company

Digium provides a variety of phone systems and custom telephony solutions. Digium VoIP phone systems and PBX phone systems are designed to fit the needs of small, medium and large businesses. The Digium product line includes turn-key business phone systems as well as telephony interface cards, Asterisk software and other components needed to create custom phone systems. Digium Switchvox SMB 4.5 is a powerful, web-aware unified communications platform that is feature rich offering fax integration, IM, video calling and more.

Fluke Networks provides innovative solutions for the installation and certification, testing, monitoring, and analysis of copper, fiber and wireless networks used by enterprises and telecommunications carriers.

Gigamon® delivers intelligent data access solutions to enhance network monitoring of data centers, service provider and enterprises. The company's world-renowned GigaVUE® aggregates, filters and replicates customized data streams to all monitoring tools. GigaVUE ensures seamless and controlled delivery of the right data at the right time to the right tools.

Innovative IP Voice & Video

Grandstream IP voice & video products offer an excellent price-performance point. Grandstream products and solutions are designed to fully leverage the benefits of VoIP broadband networks. Each portfolio is based on SIP standard and is feature rich - supporting both traditional and advanced features - support a broad range of voice codecs, and are easy to manage through web-based GUI interfaces.

redefining network efficiency

Leveraging the satellite modem expertise of parent company Comtech EF Data, Memotec offers new solution paradigms for satellite backhaul applications, resulting in unprecedented low operating costs. The NetPerformer SDM 9220 and 9230 maximize network performance and enable enterprises to create digitally converged networks for the efficient and secure transport of multiple communications applications transmitted through a private network.

MRV Optical
Communications Systems®

MRV Communications, Inc. is a leading global provider of carrier Ethernet, WDM optical transport, infrastructure management equipment and solutions, as well as network integration and managed services. MRV's solutions enable the delivery and provisioning of next-generation optical transport and carrier Ethernet services over any fiber infrastructure.

Application and Network Performance

OPNET has emerged as one of the hottest companies in the Application Performance Management (APM) and Network Performance Management (NPM) market. OPNET is an innovator in addressing the critical dependency of APM on NPM and delivers critical and timely visibility into applications that are more susceptible to network performance such as voice over IP and video.

snom technology AG develops and manufactures Voice-over-IP (VoIP) telephones based on open standard for enterprise communications. snom phones can be operated with a large number of compatible IP-PBX that support the SIP (Session Initiation Protocol). Snom devices are suitable for use in all business environments ranging from home offices to small- and medium-sized enterprises and large corporations. (Digium Asterisk Certified).
