

**Interlink Communication Systems Announces Distribution Partnership with SIP Print
Relationship Creates Expanded Opportunities for Voice and Data IP Communications
VARs with Call Recording Solutions for SIP-Compliant Phone Systems**

Clearwater, Florida, (November 10, 2009) — Interlink Communication Systems (ICS) – an internetworking focused specialty distribution company, announced today it has signed a distribution partnership with SIP Print, creators of the first and only truly affordable SIP/VoIP-based call recording platform for SMBs and small to medium sized enterprises (SMEs), to offer its products to its reseller community. SIP Print's VoIP call recording systems are a natural product line extension for VARs and distributors selling and supporting today's leading IP-PBX systems. This relationship creates expanded growth opportunities for ICS resellers by tapping into the underserved market for call recording solutions for SIP/VoIP phone systems and hybrid systems.

SIP Print is widely recognized as the industry leader in SMB voice recording providing an affordable plug-and-play appliance that offers pure system-level SIP voice recording for SMB and SME organizations with a need to record up to 200 seats per location. As organizations increasingly turn to IP-based phone systems, and as compliance requirements, regulatory changes, and corporate quality programs drive strong demand for call recording, SIP Print is well positioned as a leading provider of affordable on-premise systems to record and archive calls on these SIP/VoIP recording platforms.

“SIP Print is an excellent addition to our Line Card,” said Al Higgins, President of Interlink. “Their SIP-based call recording platform is not only compatible with many of our other strategic partners, it also represents another opportunity for Interlink VARs to meet the rising demand to deliver comprehensive, yet affordable VoIP solutions to their customer base.”

“Interlink is a natural fit for SIP Print, as a highly respected specialty distributor, Interlink delivers an impressive value proposition to its ever-increasing roster of resellers,” said Don Palmer, CEO and President of SIP Print. “We are pleased to join forces with ICS in communicating the availability and value of SIP Print’s award-winning yet affordable call recording solution for IP communications systems. Their market coverage and strong support infrastructure will help drive SIP Print’s products even deeper into the SME market.”

SIP Print's voice recording systems are compatible with mainstream SIP/VoIP phone systems and hybrid systems, including Allworx, Aastralink, ADTRAN, Altigen, Avaya Distributed Office, Cisco, Digium, Epygi, Fonality, Grandstream, Mitel, NEC 8100, NEC 8300, Nortel, ShoreTel, Toshiba, Zultys, 3Com, among others.

And because SIP Print supports SIP at the communications system level, SIP Print's patent-pending platform can also record advanced functions like voicemail or "follow-me" calls on mobile phones or other off-premise phone numbers, ensuring endpoint accessibility.

Resellers interested in receiving additional information about SIP Print and its award-winning SIP/VoIP call recording solutions should contact Interlink today at 800-638-8481

About Interlink
