

Why Become a Gigamon® Solution Provider?

At Interlink, we believe that collaborative relationships with vendors and reseller customers encourage creativity in developing and supporting programs that result in delivering the best possible outcomes.

One example is our *exclusive* distribution relationship with Gigamon - a manufacturer who employs a "*Lead with the Channel*" strategy with their market leading solutions in traffic visibility networking based on the GigaVUE® traffic visibility fabric.

Traffic visibility is an emerging "*best practice*" for passive monitoring of mission critical networks. Gigamon is the market leader in traffic visibility technology for network monitoring and analysis and delivers intelligent, pervasive, dynamic visibility into the network with its patented GigaVUE platform and Flow Mapping technology.

The GigaVUE portfolio of high availability and high density Traffic Visibility Nodes intelligently deliver the appropriate network traffic to security, monitoring or management systems.

Partner with the Market Leader. Learn how you can become a Gigamon Solution Provider Today!
